

● Requests

- Ability to turn on Malware Scanner option within dashboard 55
6 years ago
- Dashboard GUI for NGINX Rewrites 82
6 years ago
- Dir Quota 43
6 years ago
- Integrate App Announcements into slack channel 12
5 years ago
- Custom SSL within the UI 36
6 years ago
- Separate Staging Server for Staging Sites 35
6 years ago
- Custom domain for Staging sites. 64
6 years ago
- Show Server and Site Storage Utilization 19
6 years ago
- Restore backups to staging or new site installs 40
6 years ago
- Hetzner Integration 40
6 years ago
- Option to ignore fbclid, utm_, etc. parameters on ngninx to avoid server cache misses 8
5 years ago
- File Manager in UI 51
5 years ago
- Postmark Integration 56
6 years ago
- AWS SES Integration 9
3 years ago
- Extend Session Duration & Improve Mobile 2FA Experience 1
2 months ago
- Gridpane Team Members Addon 2
10 months ago
- View Backups at A Glance 26
5 years ago
- Backup is missing mysql stored procs 2
2 years ago
- Delegate Access 2
5 months ago
- Need a toggle alert if snapshot failover site synchronizations fail or get interrupted 3
6 months ago
- Add Arm64 (Ampere) server support 3
2 years ago
- Add tags / labels for site sorting / filtering 53
6 years ago
- Fortress dropdown: Remove 2FA requirement for admins/editors 1
3 months ago
- Host Non-WordPress Sites with 1-Click 36
6 years ago
- Add more reliable default DNS resolvers 1
4 months ago
- Ability to configured Slack notifications on a per-server basis 2

● In progress

- PanelPress V2 6
6 months ago
- Features as Addons 2
6 months ago
- GridPane API 12
5 years ago
- CLI Improvements 8
4 years ago

● Live

- Add SSH key to every server 3
3 years ago
- Add more than one system user to site 5
4 years ago
- Create multiple SFTP users 54
6 years ago
- Multiple SSH Keys per System User and allow Staging to be set to it's own User 68
6 years ago
- Force teams to use 2FA 5
4 years ago
- Enhance e-mail change security procedures 5
5 years ago
- Deleting Site; also delete System User 10
5 years ago
- Beter Info: When Live->staging or staging->live push FAILS 2
5 years ago
- Add System Users when Cloning 3
5 years ago
- 2FA compatibility with other Authenticators 13
5 years ago
- Restore only files or database from a backup 9
5 years ago
- Obfuscate API credentials 7
6 years ago
- Team Permissions before Accepting 5
6 years ago
- SSH as System User, not root 37
6 years ago
- Random Password Generated for System Users by Default 9
6 years ago
- Expand New Site Configuration Options 73
6 years ago
- Multiple Cloudflare Accounts 30
6 years ago
- Multiple Provider Accounts (Cloud, DNS, Backup, SMTP) 55
5 years ago
- Easy Website Suspension 120
5 years ago
- Remove target="_blank" from "LOGIN" link on website front end. 1
3 years ago
- [DULPLICATE] Use CLI instead of wget for GP-cron 1
3 years ago
- Add Date and Time to Backups 4
5 years ago
- Add Server type labels when adding and listing servers 2
5 years ago
- Auto AutoSSL 11
5 years ago
- Snapshot Failover - display server name in addition to IP 5
5 years ago
- UpCloud servers to GridPane 8
5 years ago

● Planned

- Easy view of Tools Progress 13
5 years ago
- UpdateSafely Pro Re-Release 71
6 years ago
- Queuing of Tasks via FIFO Queue. 20
5 years ago
- Git Integration Icon 3
2 years ago
- Lists Sites Under A Server 6
